

Claims 1-8: (Cancelled)

Claim 9: (Currently Amended) ~~The method of claim 5,~~ A method for inhibiting angiogenesis, comprising:

administering a nucleoside in an amount effective to inhibit angiogenesis, to a patient in need of such treatment, the nucleoside comprising glucosamine, and wherein the glucosamine comprises at least one tunicamycin and functional derivatives thereof, and wherein the at least one of tunicamycin and factional derivatives thereof is administered for a period of time, subsequently the administration of the at least one of tuniumycin and functional derivatives thereof is suspended for a period of time of at least about 1 week, and subsequently the administration of the at least one of tunicamycin and functional derivatives thereof is resumed.

Claims 10-13: (Cancelled)

Claim 14: (Currently Amended) ~~The method of claim 13,~~ A method for inhibiting angiogenesis, comprising:

administering a nucleoside in an amount effective to inhibit angiogenesis, to a patient in need of such treatment, the nucleoside comprising glucosamine, wherein the glucosamine comprises at least one of tunicamycin and functional derivatives thereof, and wherein the glucosamine is administered for a period of about 1 week to 6 months at a daily dosage of about 5 to 20 mg/kg of body weight, subsequently the administration of the glucosamine is suspended for a period of about 1 week to 6 months, and subsequently the glucosamine is administered for a period of about 1 week to 6 months at a daily dose of about 5 to 20 mg/kg of body weight.

Claim 15-17: (Cancelled)

Claim 18: (Original) A method for inhibiting angiogenesis, comprising:

administering tunicamycin in an amount effective to inhibit angiogenesis, to a patient in need of such treatment;

wherein the tunicamycin is administered for a period of about 1 week to 6 months at a daily dosage of about 5 to 20 mg/kg of body weight, subsequently the administration of the

tunicamycin is suspended for a period of about 1 week to 6 months, and subsequently the tunicamycin is administered for a period of about 1 week to 6 months at a daily dosage of about 5 to 20 mg/kg of body weight.

Claims 19-92: (Cancelled)
